On the web: on facebook: I also appreciate your feedback.Q: How to properly call base.OnPropertyChanged I have a custom control that will add a tab page. I need to add an instance of this control within a tab page that is created in its own XAML. I am calling base.OnPropertyChanged to provide any logic that should be changed on that control, and this works well. My problem is I am calling base.OnPropertyChanged again when I want to close the current tab page, and this time it is being overridden by the OnPropertyChanged from the TabControl. private void OnPropertyChanged(string propertyName) { if (PropertyChanged!= null) { PropertyChanged(this, new PropertyChangedEventArgs(propertyName)); } } public void Close() { var myControl = this.Content as MyControl; var vsUIControl = myControl.vsUIControl; vsUIControl.OnPropertyChanged(vsUIControl.PropertyNames.LeftPaneButton, "MouseOver"); PropertyChanged?.Invoke(this, new PropertyChangedEventArgs("Close")); base.OnPropertyChanged(this, new PropertyChangedEventArgs("Close")); } What I want to happen is when myControl.vsUIControl.PropertyNames.LeftPaneButton is modified I want it to call OnPropertyChanged, but in this code it will call OnPropertyChanged again, and then it will call OnPropertyChanged again and so on. I have also tried to set a flag to prevent it from calling OnPropertyChanged multiple times, but the base.OnPropertyChanged is always getting called, because it's not actually calling the base.

Sell Buy Share Open Beta Review: Dungeon Siege 3 [Review] Share Open Beta: I have played quite a lot of games this year, I've played Arkham Knight and Horizon Zero Dawn as well as remastered Tomb Raider, all of which are great, but none have had quite the influence on my gaming than Dungeon Siege 3. When the game released it was nothing like the highly-anticipated Dungeon Siege 3 that I was expecting. The game was more of a hectic, turn-based tactics game with a FPS view rather than the graphic-novel type Dungeon Siege that we all wanted. However, you can't deny that the game did a lot of things right with its gameplay. So, in this review, I'll go into more detail as to what exactly I liked and disliked about the game. Gameplay: Gameplay is very similar to a game like Sins of a Solar Empire, in the sense that it features some turn-based tactics gameplay mixed with an RTS (Real Time Strategy). The first few missions you play through will be turn-based, however the final mission is an RTS-style mission. If you didn't know, this is similar to the Warcraft and Starcraft series where you are on a huge map and you are given orders from your leader to control certain units/tanks. What I mean is that you go into a mission and play through it turn-based, then when the mission is over you go back to the beginning and you have a different mission. In this game, missions are one of three different types: Abyss Missions, Dungeon Missions and Town Missions. Every mission type has its own unique objective. What I liked about Dungeon Siege 3's gameplay is that the mission types and objectives are varied and are all enjoyable to play through. In the final mission of the game, you can do nearly anything as an RTS, it's up to you to do it however you want. I thought it was a great idea and one of the best parts of the game. The first few missions are turn-based, but the last two missions are RTS in nature. The mission types are very unique and the entire gameplay mechanic is interesting. There is an option in the menu called "Leadership" which has certain leader types for each of the three mission types. The leader types are all very interesting and are very unique. In

, Egypt© The Museum of the Egyptian Antiquities (above) showcases some of the best preserved, and most decorated, objects from the tomb of King Ramses IX in the Valley of the Kings. It was located in what is today called the Pyramid of Ramses IX dating back to 1850–1850 BC and it is located just one kilometre south of the Valley of the Kings and very close to the Fifth Dynasty pyramids (immediately to the south). I am lucky enough to have visited the museum (in August 2012) for the first time. I was so impressed by the heritage treasures discovered, it was just incredible to see the beauty and history of this ancient civilisation through the gaze of the lens of the photographer. Pharaoh Khufu, one of the pharaohs of the Fourth Dynasty of Egypt. He had four sons as Pharoah. Guard and the gate to the tomb of the Khufu son, Tutankhamon. The Imhotep Museum, a magnificent painted granite block, believed to have been designated to guard the mummy of Pharaoh Djoser, believed to be Pharaoh Djoser. The block is canted so that sunlight can shine upon it creating a prism of light and shadow on the ceiling of the tomb. Most of these types of blocks had survived relatively undisturbed into the 1990s, after which they were painstakingly removed by Egypt's restoration teams, with many of them sold for huge sums of money. Decent photoshopped picture courtesy of this wonderful blog. A copy of the papyrus where Djoser declared himself is displayed in this museum. The Gruen Home study Museum, Berlin. Grief in a closed tomb at the end of the First Dynasty, 4000 BC. A Teti sarcophagus dating from the 25th Dynasty, probably from the Unas period. It was found in 1972, has never been unwrapped and is believed to have been brought in pieces from Qena. Due to its condition, the unopened and unpainted sarcophagus is obviously too fragile to be displayed in the open and is covered up during the winter. The Museum of the Library of Alexandria, Alexandria, Egypt. It opened in 2008 and was the world's first museum to be built inside another

museum. It should give a much better idea of what the Library of Alexandria of more than 2000 years ago would have looked like. Di
