Gnu tools Gnu tools are applications made by the Free Software Foundation that are sometimes used as alternatives to commercial and closed-source software products. You can find more information about these applications on the web at `www.gnu.org`. For example, instead of using Photoshop, try one of these tools if you want to do a lot of image editing: Gimp: A graphical user interface (GUI) for image editing that supports a large number of tools for editing, such as cropping, rotating, performing adjustments, creating new layers, and so on. The GUI in Gimp is similar to Photoshop, so you can get started in no time. Unlike some other tools, Gimp doesn't have a set price for the Gimp Suite; you pay per tool rather than for the whole program. Inkscape: This is the Linux-based version of Adobe Illustrator. Inkscape allows you to open a file, make graphics and edit them (add text, shapes, and so on), create a new document, and do all the things that Illustrator does. It has a very simple interface for creating and editing a small number of objects that you can quickly turn into a graphic. You also can create a large number of objects in an artistic manner. You can draw objects in a path-based system, which is similar to the way in which Illustrator and other applications work. Inkscape is free and cross-platform. With the conclusion of his first legislative session, Maryland Gov. Larry Hogan continues to make Maryland history. And for the first time in many years, he's faced with a budget shortfall. We should all be proud that he didn't simply give back the entire $1 billion in state budget cuts he took from the state's budget over the past two years. Instead, he put the cuts back into the budget, worked with both sides of the political aisle, and came up with a budget agreement that reflects his philosophy of being smart about spending and being fiscally responsible. The budget deal Hogan signed last week doesn't allocate any new revenues to the state, but it does place an important cap on the growth of our spending. As a result, we are now projecting a 2016-17 state budget surplus of $400 million. That's a significant increase from the $650 million projected surplus from last year, thanks in large part to the fact that we made investments in infrastructure, education and human services programs that the voters have directed us to make. Hogan has been criticized for raising the sales tax by a little more than half a percentage point, and for agreeing to a modest increase in the cigarette tax. However, his decision to veto the progressive income tax bill that passed the General Assembly this session raises more questions than it answers. When you compare the numbers, Hogan's income tax veto increases the burden on the highest income taxpayers by $72 million over three years and increases the total state tax burden by more than half a percentage point. It's true that the income tax bill wouldn't have gone into effect if Hogan had signed it, but the fact is that he was given the opportunity to protect the critical investments
